

# Bookkeeping - README

## Preamble

***Bookkeeping*** is a Java based bookkeeping software. It stores data in a SQLite database and supports multiple accounts.

Accounts can have different currencies. ***Bookkeeping*** exchanges one currency for another automatically. To make your life more comfortable it's possible to create templates. Data can be exported to CSV.

***Bookkeeping*** is free software. Permission is granted to copy, modify and redistribute it under the provisions of the GNU General Public License Version 3, as published by the Free Software Foundation; see the file COPYING for licensing details.

Note, in particular, that ***Bookkeeping*** is provided “as is”, in the hope that it may prove useful, but WITHOUT WARRANTY OF ANY KIND; not even an implied WARRANTY OF MERCHANTABILITY, nor of FITNESS FOR ANY PARTICULAR PURPOSE. Under no circumstances will the authors accept liability for any damages, however caused, arising from the use of this software.

## Requirements

***Bookkeeping*** requires the following components:

- picocontainer (<http://picocontainer.org>)
- SQLite JDBC driver (<https://bitbucket.org/xerial/sqlite-jdbc>)
